

GAUSSIAN project NEWSLETTER: Latest News & Updates

GAUSSIAN @ AIRSPACE World 2025, Lisbon

The GAUSSIAN project recently participated in **AIRSPACE World 2025**, held from May 13th to 15th in Lisbon, an event that gathers global leaders in space and aviation. During the event, GAUSSIAN joined the panel organized by [EUSPA - EU Agency for the Space Programme](#) on "**EU Space for Drones and VCA**", guided by Dr. [Jakub Karas](#). The panel explored the critical theme of drones and Very Low-Level Airspace operations, sparking a productive exchange on the technical challenges, organizational strategies, and necessary regulatory frameworks.

GAUSSIAN's involvement focused on sharing its knowledge, breakthroughs, and future-oriented vision. This participation underlines our ongoing commitment to overcoming barriers and advancing the integration of unmanned aerial vehicles into operational systems in the years ahead. ([Marco Pini](#))

iCNS (Integrated Communication, Navigation and Surveillance) conference.

The GAUSSIAN team participated in the prestigious [ICNS Conference \(Integrated Communication, Navigation, and Surveillance\)](#). This remarkable event provided us with the opportunity to showcase our innovative project, complete with a mock-up of the platform that will be utilized in demonstrations and flight tests.

The conference served as an excellent stage for us to highlight our ambitious goals, cutting-edge technologies, and the new #Galileo services that underpin our future developments. It was exciting to engage with industry experts, exchange ideas, and share inspiring, innovative solutions.

A special thanks to [Matěj Kučera](#) from [Honeywell](#), whose hospitality at the Honeywell booth made this vital visibility for our project possible. We are ready to soar into new adventures!
